Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 September 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 13, 2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 6, 7, 9-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of Farfaglia (US Patent 4,085,664).

With regards to claims 1, 6, 7, 9, 10 and 16, Applicant, at pages 1 and 2 of the specification to be known as AAPA, discloses mandrels of varying diameters to accommodate changes in diameter of components fabricated thereon. AAPA does not disclose a core mandrel with a plurality of adapter sleeves to provide mandrels of varying outside diameters. However Farfaglia teaches a core mandrel 41 with a kit of

adapter mandrel sleeves 47 to provide mandrels with varying diameters, the mandrel sleeves being interchangeably engageable with the core mandrel (col. 1, lines 6-15, 26-48, col. 2, lines 7-29, col. 6, lines 4-8 and 63-68, and col.7, lines 1-16), with interlocking mechanism in the form of lug-and-slot type locking devices (col. 2, lines 27-47).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made, to have substituted the plurality of mandrels with varying outside diameters of AAPA with a core mandrel and a plurality of adapter sleeves, in light of the teachings of Farfaglia, in order to economically provide mandrels of varying outside diameters. Applicant should note that the mandrel sleeves of Farfaglia have an inside diameter sized to engage the core mandrel outside diameter across an entire width of the adapter sleeve. Regarding the recitation of the sleeves material and their thermal expansion rate as compared to the core mandrel, Applicant should note that it is within the general knowledge of one of ordinary skill in the art to have used steel adapter sleeves. Furthermore it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. See also *Ballas Liquidating Co. v. Allied industries of Kansas, Inc.* (DC Kans) 205 USPQ 331.

For claims 2, 3 and 11-14, Applicant should note that it is within the general knowledge of one of ordinary skill in the art to provide appropriate and effective interlocking mechanism between the core mandrel and the adapter sleeves.

Response to Arguments

4. Applicant's arguments with respect to claims 1-3, 6, 7, 9-14 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
